Instructions for Listing Auction Lots

Just click the cursor into the first central box and start typing. No need to do anything else as it will automatically enter/return.
Click into next box to start next description. Click in the appropriate estimate box to record estimates.

	This is the format to follow	
	Cal and type. H/stamp **Bold**. Bullet Details. Other Details. Condition. Ref.	**Est**
	Example below	
	303 Mk VI Ball. H/s **R^L VI** CN RN bullet. Early load. Neck Crack. (Huon p65)	**10**

Note: Condition is only necessary if the round is other than Very Good, then, just note the difference.
Headstamps are **BOLD**. Book references are in (Brackets)

Book references, where provided, are shown in (brackets) and take the following form –

(Dat V3 p43)	**Dat**ig Cartridges for Collectors **V**olume **3** **p**age **43**
(Hoyem V3 p43)	**Hoyem** History and Development of Small Arms Ammunition **V**olume **3** **p**age **43**
(Huon p255)	**Huon** Military Rifle & Machine Gun Cartridges **p**age **255**
(T p118 L4)	**T**ucker Shotshells of Australia **p**age **118** **L**eft column **4**th illustration
(TA p27 C2)	**T**ucker Shotshells of Australia **A**ddendum 2000 **p**age **27** **C**entre column **2**nd illustration

Abbreviations Used:

(Condition) Exc – Excellent VG – Very Good G - Good F - Fair

(General) H/s – Headstamp o/w – otherwise c/p - case print t/w - top wad pri - primer

(Bullet) PP – Paper Patched L – Lead CN – Cupro Nickel GM – Gilding Metal
RN – Round Nose FN – Flat Nose SP – Soft Point HP – Hollow Point
PSP – Pointed Soft Point C/t – Copper tubed FMJ – Full metal jacket

Example
A gilding metal (copper colour) jacketed bullet with a round nose that has a soft point (lead tip) is typed as GM RN SP bullet.

Please save this file, which is a 'WORD' table, under **two** different names. That way you can delete the info page I have typed in these rows and simply start typing your list, whilst still having a copy to refer back to.
All changes like inserting a row etc. must be done through the dropdown 'TABLE' box or 'Table Tools' on your top toolbar. The numbering is auto so when you insert, or delete, a row the number reflects the change.

For small arms ammunition I use the word **bullet** when referring to the bullet part of the round, not projectile. A bullet is something fitted to a cartridge, whereas a projectile can be a stone projected from a slingshot. I mainly use projectile when referring to artillery.

These are not rules, just suggestions, so that we keep the auctions as easy for readers to follow as we possibly can. I urge you to provide good descriptions for your items including its condition as the Club has a return policy for absentee bidders if items are not as described. You will also attract much higher bids from absentee bidders if they know EXACTLY what they are bidding on.

Email completed lists to Alan Parker alanilona@bigpond.com

Lot	**Description** (All rounds are in very good condition unless noted otherwise)	Est
